

VIACHESLAV KOMARIVSKYI

Senior Software Engineer — Medical Imaging · Roche

kom482@gmail.com · komarivskyi.com · Warsaw, Poland

Hi, I'm Viacheslav Komarivskyi, a software engineer from Poland, currently living in Warsaw.

I have more than 10 years of experience as a developer, and these days I focus on medical imaging. I love building fast, reliable web applications with Angular, React, TypeScript and Three.js.

WORK EXPERIENCE

since 2022 **Senior Software Engineer**
Roche, Poland

Senior software engineer specializing in medical imaging visualization, with a primary focus on Digital Pathology and extensive experience in Radiology and Ophthalmology. Develop and optimize complex rendering solutions, integrating commercial and open-source imaging libraries to visualize algorithm results, annotations, and overlays, enabling intuitive interpretation of medical imaging data and supporting clinical workflows.

2016 - 2022 **Lead Software Developer**
2013 - 2016 **Front-End Developer**
Medorado, Poland

Led the development of web applications and cross-platform mobile apps for major pharmaceutical clients, including Roche, Pfizer, Lilly, Adamed, and Boehringer Ingelheim. Developed Ionic and Angular mobile applications and interactive 3D web experiences using WebGL, Three.js, and Blender, including virtual exhibition spaces and immersive conference environments.

Developed a high-performance medical live-streaming platform supporting up to 15,000 concurrent users per event, with automatic failover between multiple streaming sources.

- Technical architecture, technology selection, and effort estimation.
- Development planning, task coordination, and team mentoring.
- Application performance optimization, deployment, and reliability.

2012 - 2013 **Junior Demandware Developer**
Astound Commerce, Ukraine

Participated in the development of websites for FinishLine, L'Oréal and Giorgio Armani.

TECHNOLOGIES

Frameworks & libraries

Angular, NgRx, RxJS, React, Ionic.

Languages & runtime

JavaScript, TypeScript, Python, Node.js.

Medical imaging & visualization

Cornerstone.js (OHIF), OpenSeadragon, VTK.js, Three.js, Orthanc, DICOMweb. Integration of medical imaging libraries into production applications, including bug fixes and contributions to the Cornerstone.js open-source project.

Test automation & validation

Extensive experience with Cypress and Playwright for automated testing of complex medical imaging platforms, including visual regression testing, image comparison, and rendering performance measurement. Strong domain expertise in imaging viewer behavior and rendering pipelines, enabling effective collaboration with UI automation engineers to design robust tests for complex visualization workflows.

AI-assisted & agentic development

Hands-on experience with agentic software development workflows using Claude Code and AI coding agents for code generation, refactoring, debugging, code review, and test automation. Experienced in integrating AI-assisted workflows into software engineering practices to improve development efficiency and code quality.

EDUCATION

2008 - 2012 **Vinnytsia State Pedagogical University, Ukraine**

“Mathematics, Physics and Technology Science”
Bachelor degree of Mathematics

As a student I actively took part in technical and science competitions, twice becoming a prize-winner of the “Microsoft Partners in Learning” contest. I also worked on a range of educational projects, building web resources, platforms and software for learning.
